

73 Extract

Unleashing Insights from Unstructured Data

Capture transformative portfolio insights with AI-enabled technology that extracts unstructured data with unmatched accuracy.

In today's dynamic financial landscape, alternative asset managers are inundated with vast volumes of unstructured data. **73 Extract** is your solution, designed to transform this data into structured, actionable intelligence, empowering you to make strategic investment decisions with confidence.

73 Extract is your answer.

Trusted by the world's largest private capital fund managers, **73 Extract** provides one-click data ingestion from portfolio companies regardless of format, making it the easiest platform for portcos, and helping GPs collect more data points than ever before.

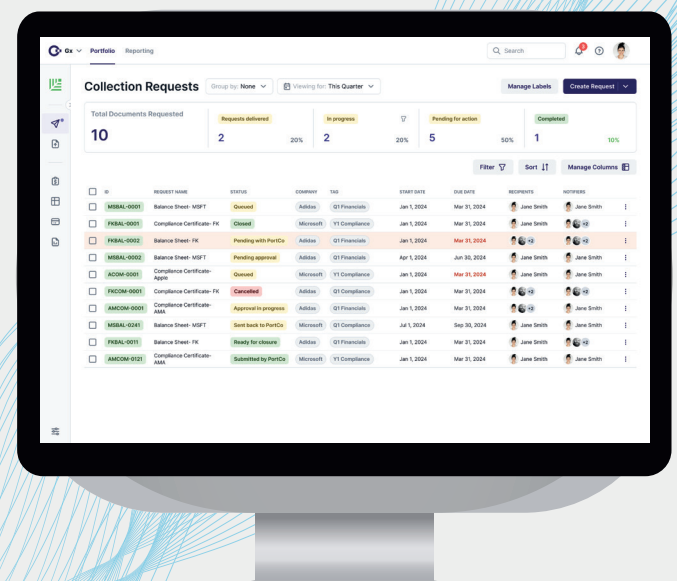

Use **73 Extract** to tap into previously unrecognized sources of portfolio insights using AI-enabled technology.

With **73 Extract**, human intelligence is augmented with structured, comprehensive, and consistent data, providing a new perspective for more informed investment decisions.

Use 73 Extract to Analyze:

Data Types: Tables, Paragraph, Charts, Covenants, ESG, Email and Email Attachments

Formats: .pdf, .csv, .xlsx, .pptx, .png, .jpeg and .docx (via Email Wizard)

Benefits

Unstructured Data Processing

Unlock insights hidden within unstructured data such as paragraphs of text, tables, charts, and more. **73 Extract** excels at revealing valuable portfolio insights previously overlooked.

Efficiency & Speed

Powered by AI, **73 Extract** processes data faster, enabling quicker calculations and streamlined reporting. Experience efficiency gains that reduce time-intensive manual data entry.

Accuracy & Precision

Achieve 99% accuracy in data extraction and analysis, allowing your teams to make data-driven decisions with precision.

Auditability & Traceability

With comprehensive data traceability, **73 Extract** ensures no data loss, highlights outliers, and provides a reliable audit trail for compliance and verification needs.

Advanced Features

Automated Data Extraction

Using advanced AI and machine learning, **73 Extract** automatically pulls relevant information from unstructured data sources such as PDFs, emails, contracts, and other documents, drastically reducing the need for manual input and ensuring critical data is captured with precision.

Natural Language Processing (NLP)

Leverage NLP to interpret and categorize complex data with contextual understanding, making it easier to integrate insights with structured datasets.

Data Normalization and Structuring

73 Extract converts unstructured data into a standardized format, normalizing diverse data sources for seamless integration with other financial systems.

Scalable Data Management

Handle large volumes of data effortlessly. **73 Extract** is designed to support extensive data inputs, making it ideal for organizations managing data at scale.

With 99% accuracy, **73 Extract** is unmatched in its ability to extract data from a variety of sources, enabling you to achieve digitalized document processing that scales, vastly improved data accuracy and consistency, and massive efficiency gains.

Transform your data extraction and analysis with the power of AI. Ready to see **73 Extract** in action?
